Palembang, South Sumatra, Indonesia

I'm an Informatics Engineering student with a strong passion for programming and graphic design. I have experience in Java and JavaScript programming languages, and I am currently focusing on front-end development. I've explored JavaScript in depth, and I aim to grow into a full-stack developer. I possess excellent teamwork and communication skills, adaptability, problem-solving abilities, and leadership qualities.

Education Level

Universitas Sriwijaya - Palembang, South Sumatra, Indonesia

Bachelor of Degree in Informatics Engineering, 4.00/4.00

- 6th Semester

Work

DasarNgoding

Jan 2026 - Present

Founder & Content Creator

- Building DasarNgoding, an educational platform focused on basic programming concepts. Creating beginner-friendly content about coding fundamentals to help aspiring developers start their coding journey.

Bank Sumsel Babel Palembang

Dec 2025 - Jan 2026

Information Technology and Information Systems Intern

- Built a digital catalog web portal with integrated CMS using Next.js 15, TypeScript, React 19, and Supabase (PostgreSQL), enabling self-service content management for non-technical staff. Designed database schema, developed admin panel with rich text editor and authentication, and deployed to Vercel. The solution improved Account Officers' presentation efficiency and eliminated content update bottlenecks.

Organisational Experience

Google Developer Group on Campus: Universitas Sriwijaya

Dec 2025 - Present

Core Team of Front End Development

- Designed and delivered a structured frontend development curriculum covering Git & GitHub, Tailwind CSS, JavaScript ES6, React.js, and Firebase integration.
- Led weekly learning sessions, hands-on assignments, and project-based mentoring to ensure members built functional and scalable web applications.
- Guided members through React best practices, state management, routing, performance optimization, and backend integration using Firebase
- Conducted regular evaluations, code reviews, and feedback cycles to track learning progress and improve overall learning outcomes.

Google Developer Group on Campus: Universitas Sriwijaya

Jan 2025 - Present

Member of Front End Development

- Gained hands-on experience in web development, focusing on version control with Git and GitHub for collaboration, styling with Tailwind CSS, and deepening understanding of front-end development by mastering core fundamentals of React.js, applying best practices, and developing several projects as practical implementations.
- Contributed as a curriculum team member for the "UI/UX & Web Dev Study Jams – From Pixels to Code" program, focusing on React.js and Tailwind CSS. Helped design learning materials, including modules and guidebooks, contributed to building a responsive training website, and guided 30+ participants throughout the sessions.
- Led a team that won 1st place in a website redesign competition for the official Fasilkom UNSRI site, taking the front-end role by slicing UI/UX designs into responsive code, implementing API integration, and coordinating effectively with UI/UX and Back-End members to ensure a successful and collaborative project execution.
- Served as Project Leader and Front-End Developer for Thriftoria in the GDGoC Final Project, building a responsive React.js + Tailwind interface, integrating backend APIs, managing state with Context API, and delivering complete documentation with clean Git workflow.

Faculty of Computer Science, Universitas Sriwijaya

May 2025 - Aug 2025

Laboratory Assistant of Database and Big Data Laboratory

- Appointed as a Laboratory Assistant at the Database and Big Data Laboratory, supporting academic and administrative tasks. Assisted the lab head and lecturers in preparing a new Artificial Intelligence study program by drafting 5 Semester Learning Plans for AI-related courses.

Staff of Information Technology Development

- Self-learned web development, focusing on HTML, CSS, JavaScript, and version control using Git and GitHub
- Served as a member of the Code League #2, responsible for creating competitive programming problems
- Served as a member of the academic competition division in the event "IF FEST 2024," tasked with developing competitive programming problems based on Codeforces Ratings
- Served as a member of the web development competition division for the event "Srifoton 2024," responsible for recruiting and coordinating three judges for the competition
- Led as the Head Organizer for a programming training event, coordinating 10 mentors and engaging 150+ participants across 7 weeks of meetings
- Recognized as Staff of the Month (Global) for November 2024

Google Developer Student Clubs Universitas Sriwijaya

Nov 2023 - Aug 2024

Member of Graphic Design Division

- Learn to use Figma & Adobe Photoshop independently
- Prepared assets and content for Instagram feeds of GDSC Unsri
- Served as a creative design committee member for various events, including "Mastering Your UX Research," "Webinar Data Secure," and "Media Content & Creative GDSC Unsri Analysis," contributing to the development of visual assets and event materials.
- Led the creative design for the "Machine Learning & Mobile Development Study Jams" event
- Led camerawork for the production of GDSC Unsri's profile video

Skills, Achievements & Other Experience

- **Hard Skills:** Adobe Photoshop, Figma, Java, Python, HTML, CSS, Tailwind CSS, Javascript, PHP, MySQL, NextJs, React JS, NextJS, Node.js, Express.js, Firebase, Supabase, Git & GitHub
- **Soft Skills:** Leadership, Problem Solving, Team Coordination, Adaptability
- **Certification:** JavaScript Essentials 1, Python Essentials 1, PCEP™ – Certified Entry-Level Python Programmer
- **Achievements:** 1st Place of Redesign Challenge by GDGoC Universitas Sriwijaya, 2nd Place of Sinergi Fest Web Development Competition 2025
